How do you want to create your project?

Do you want to benefit from all of SonarQube's features (like repository import and Pull Request decoration)? Create your project from your favorite DevOps platform.

First, you need to set up a DevOps platform configuration.

From Azure DevOps
Set up global configuration

From Bitbucket Server
Set up global configuration

From Bitbucket Cloud
Set up global configuration

From GitHub
Set up global configuration

From GitLab
Set up global configuration

Are you just testing or have an advanced use-case? Create a project manually.

Manually

Get the most out of SonarQube!
Take advantage of the whole ecosystem by using SonarLint, a free IDE plugin that helps you find and fix issues earlier in your workflow. Connect SonarLint to SonarQube to sync rule sets and issue states.
