1. **Getting Started with Red Hat Enterprise Linux**
   - What is Linux ?

2. **Accessing the Command Line**
   - Accessing the Command Line
   - Accessing the Command Line using the Desktop
   - Guided Exercise : Accessing the Command Line Using the Desktop
   - Executing Commands Using the Bas Shell
   - LAB : Accessing the Command Line

3. **Managing Files From the Command Line**
   - Describing Linux File System Hierarchy Concepts
   - Specifying Files by Name
   - Managing Files Using Command-line Tools
   - Guided Exercise : Managing Files Using Command-line Tools
   - Making Links between Files
   - Guided Exercise : Making Links between Files
   - Matching File Names with Shell Expansions
   - LAB : Managing Files from the Command Line

4. **Getting Help in Red Hat Enterprise Linux**
   - Reading Manual Pages
   - Guided Exercise : Reading Manual Pages
   - Reading Info Documentation
   - Guided Exercise : Reading Info Documentation
   - LAB : Getting Help in Red Hat Enterorice Linux

5. **Creating, Viewing and Editing Text Files**
   - Redirecting Output to a File or Program
   - Editing Text Files from the Shell Prompt
   - Guided Exercise : Editing Text Files from the Shell Prompt
   - Changing the Shell Environment
   - Guided Exercise : Changing the Shell Environment
   - LAB : Creating, Viewing and Editing Text Files

6. **Managing Local Users and Groups**
   - Describing User and Group Concepts
   - Gaining Superuser Access

- Guided Exercise : Gaining Superuser Access
- Managing Local User Accounts
- Guided Exercise : Managing Local User Accounts
- Managing Local Group Accounts
- Guided Exercise : Managing Local Group Accounts
- Managing User Passwords
- Guided Exercise : Managing User Passwords
- LAB : Managing Local Users and Groups

7. Controlling Access to Files

- Interpreting Linux File System Permissions
- Managing File System Permissions from the Command Line
- Guided Exercise : Managing File System Permissions from the Command Line
- Managing Default Permissions and File Access
- Guided Exercise : Managing Default Permissions and File Access
- LAB : Controlling Access to Files

8. Monitoring and Managing Linux Process

- Listing Process
- Controlling Jobs
- Guided Exercise : Controlling Jobs
- Killing Processes
- Guided Exercise : Killing Processes
- Monitoring Process Activity
- LAB : Monitoring and Managing Linux Processes

9. Controlling Services and Daemons

- Identifying Automatically Started System Processes
- Guided Exercise : Identifying Automatically Started System Processes
- Controlling System Services
- Guided Exercise : Controlling System Services
- LAB : Controlling Services and Daemons

10. Configuring and Securing SSH

- Accessing the Remote Command Line with SSH
- Guided Exercise : Accessing the Remote Command Line with SSH
- Configuring SSH-Key-based Authentication
- Guided Exercise : Configuring SSH-Key-based Authentication

- Customizing OpenSSH Service Configuration
- Guided Exercise : Customizing OpenSSH Service Configuration
- LAB : Configuring and Securing SSH

11. Analyzing and Storing Logs

- Describing System Log Architecture
- Reviewing Syslog Files
- Guided Exercise : Reviewing Syslog Files
- Reviewing System Journal Entries
- Guided Exercise : Reviewing System Journal Entries
- Preserving the System Journal
- Guided Exercise : Preserving the System Journal
- Maintaining Accurate Time
- Guided Exercise : Maintaining Accurate Time
- LAB : Analyzing and Storing Logs

12. Managing Networking

- Describing Networking Concepts
- Validating Network Configuration
- Guided Exercise : Validating Network Configuration
- Configuring Networking from the Command Line
- Guided Exercise : Configuring Networking from the Command Line
- Editing Network Configuration Files
- Guided Exercise : Editing Network Configuration Files
- Configuring Host Names and Name Resolution
- Guided Exercise : Configuring Host Names and Name Resolution
- LAB : Managing Networking

13. Archiving and Transferring Files

- Managing Compressed TAR Archives
- Guided Exercise : Managing Compressed TAR Archives
- Transferring Files between Systems Securely
- Guided Exercise : Transferring Files between Systems Securely
- Synchronizing Files between Systems Securely
- Guided Exercise : Synchronizing Files between Systems Securely
- LAB : Archiving and Transferring Files

14. Installing and Updating Software Packages

- Registering Systems for Red Hat Support
- Explaining and Investigating RPM Software Packages
- Guided Exercise : Explaining and Investigating RPM Software Packages
- Installing and Updating Software Packages with YUM
- Guided Exercise : Installing and Updating Software Packages with YUM
- Enabling YUM Software Repositories
- Guided Exercise : Enabling YUM Software Repositories
- Managing Package Module Streams
- Guided Exercise : Managing Package Module Streams
- LAB : Installing and Updating Software Packages

15. Accessing Linux File Systems

- Identifying File Systems and Devices
- Mounting and Unmounting File Systems
- Guided Exercise : Mounting and Unmounting File Systems
- Locating Files on the System
- Guided Exercise : Locating Files on the System
- LAB : Accessing Linux File Systems

16. Analyzing Servers and Getting Support

- Analyzing and Managing Remote Servers
- Guided Exercise : Analyzing Servers and Getting Support
- Getting Help from Red Hat customer Portal
- Guided Exercise : Getting Help from Red Hat customer Portal
- Detecting and Resolving Issues with Red Hat Insights

17. Comprehensive Review

- LAB : Managing Files from the Command Line
- LAB : Managing Users and Groups, Permissions and Processes
- LAB : Configuring and Managing a Server
- LAB : Configuring Networks
- LAB : Mounting FIleSystems and Finding Files
