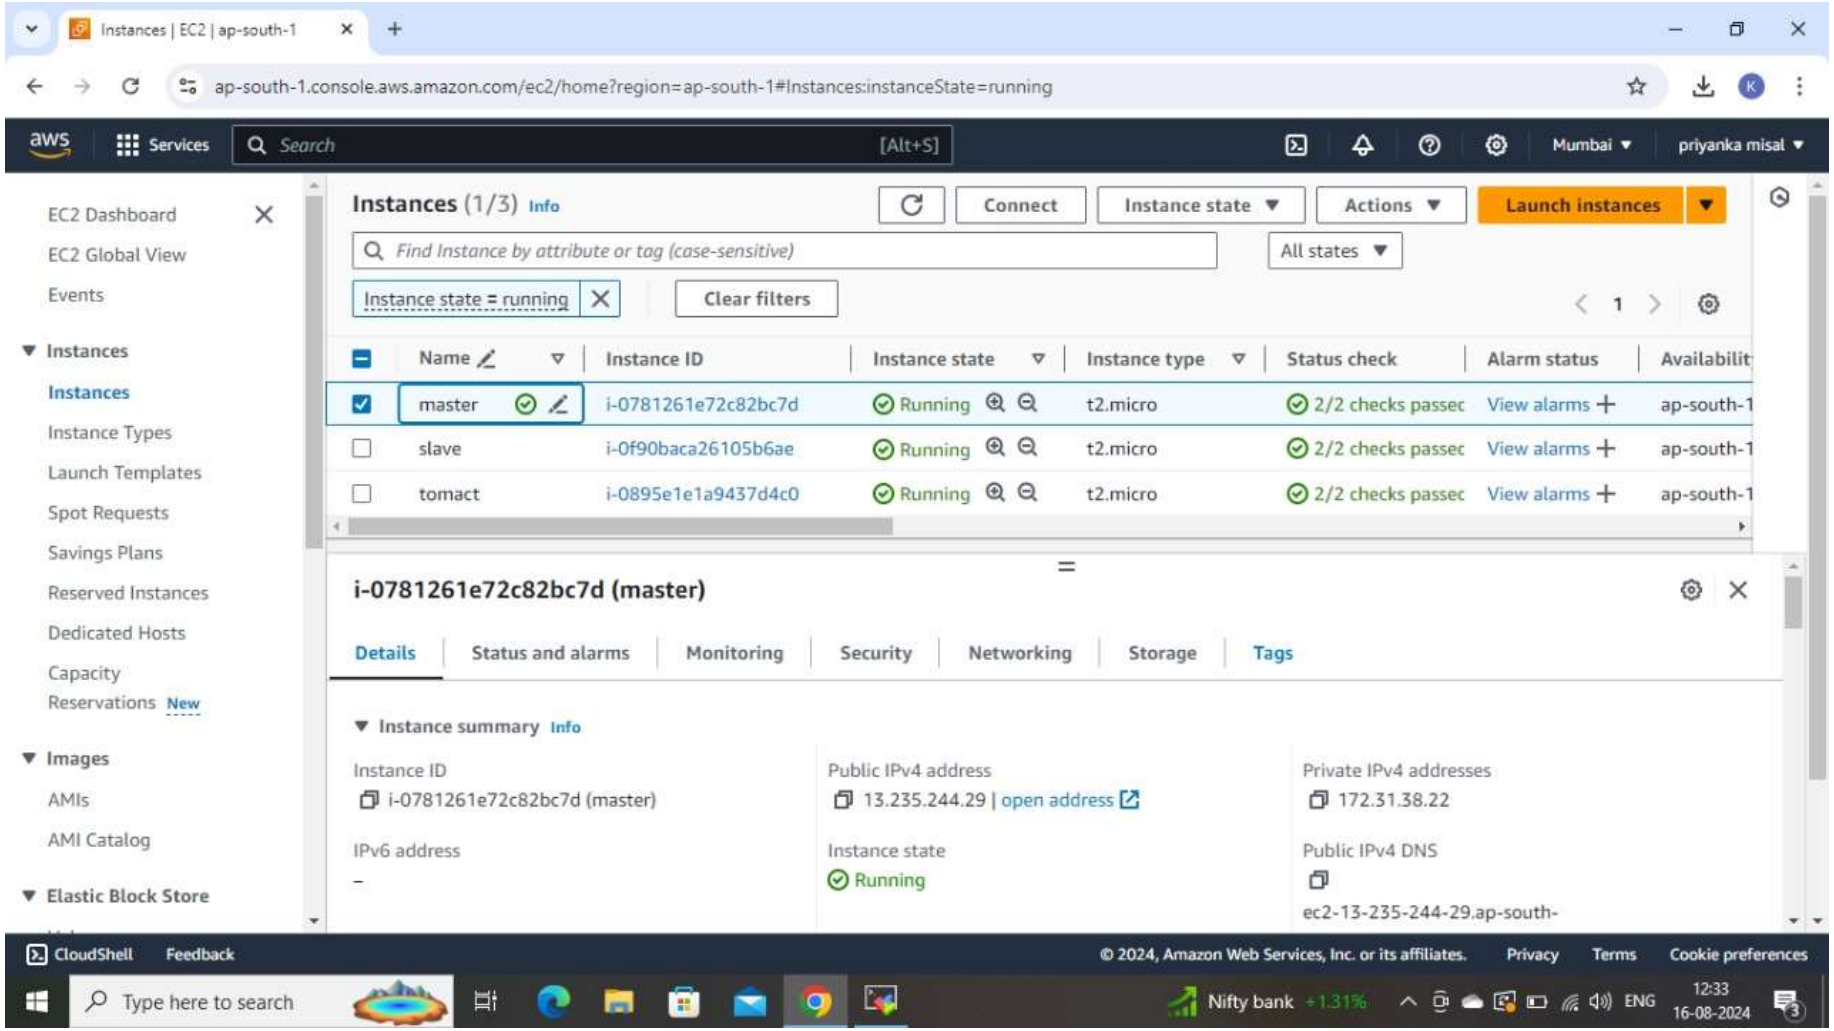
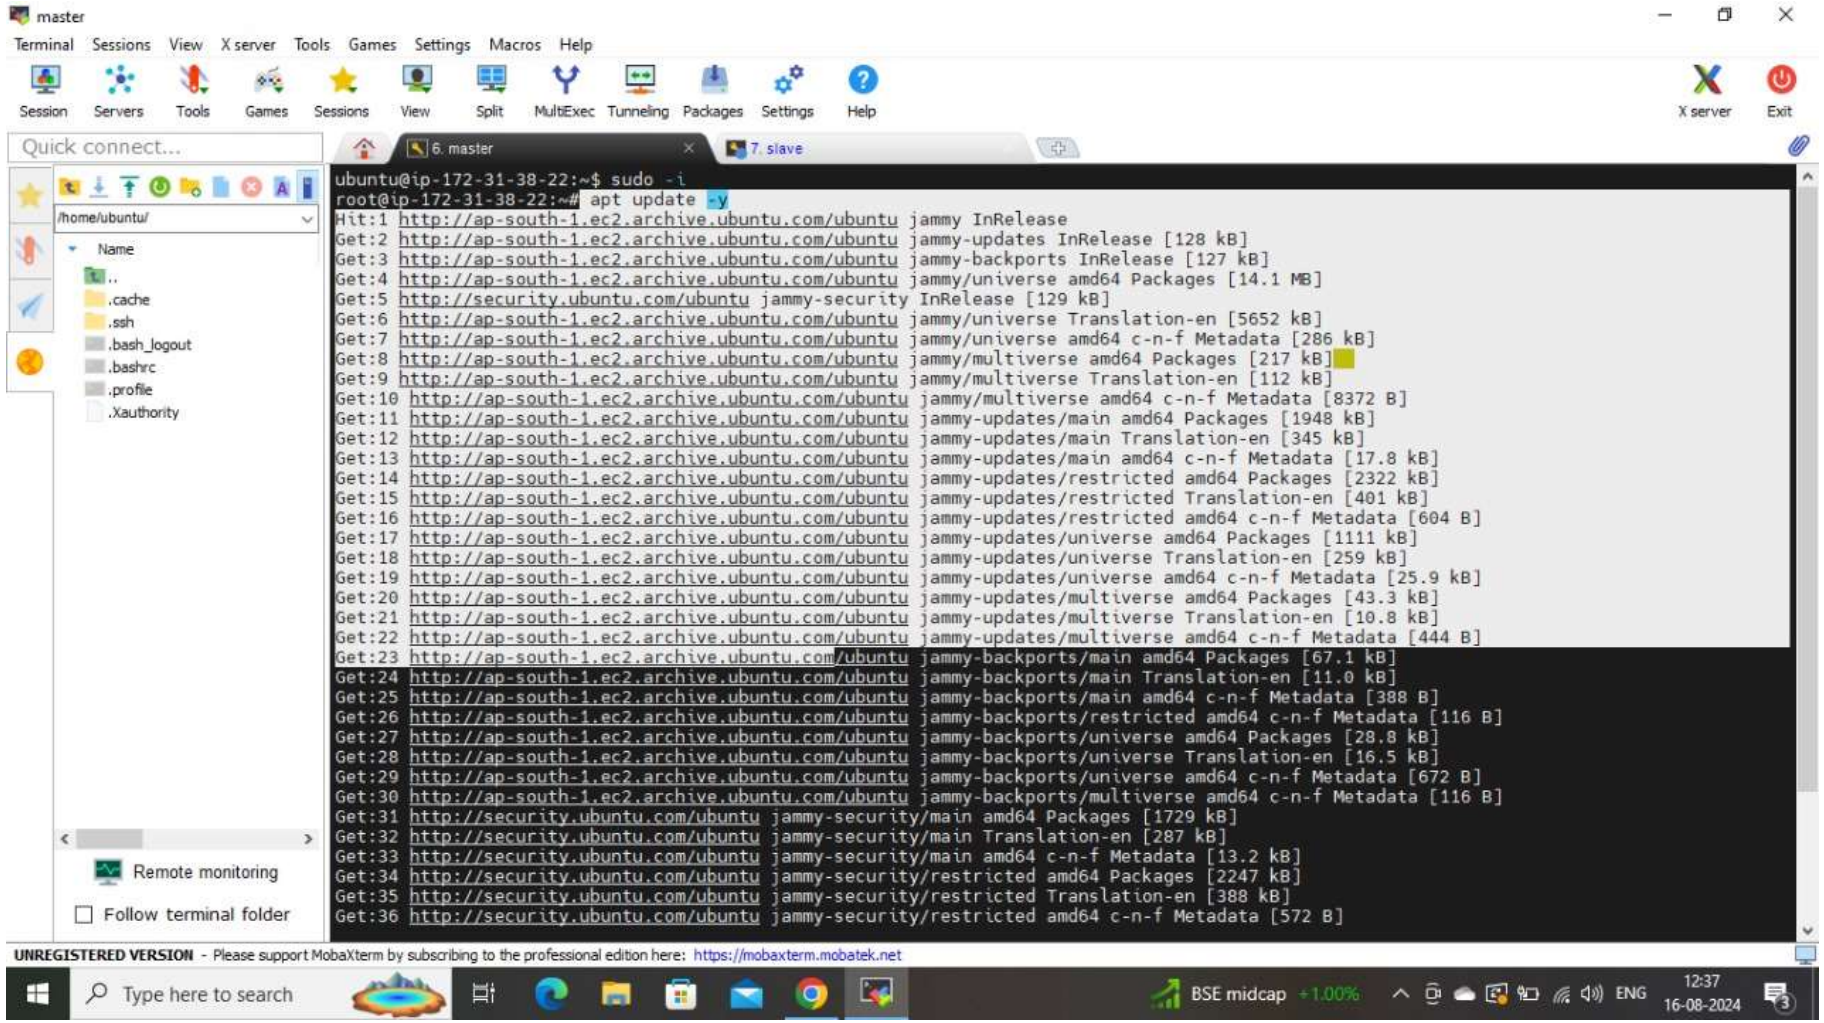
CI/CD Setup Project Using Github Action

Launch three AWS instance for master , slave and tomcat server



Update packages using command "Sudo apt update -y" for ubuntu



Install Opendjk in all instance

Using command "Sudo apt install openjdk-11-jre -y"

```
root@ip-172-31-38-22:~# sudo apt install openjdk-11-jre -y

Generate ssh key using command "ssh-keygen -t rsa -b 2048 -m PEM"

```
root@ip-172-31-32-251:~# useradd devopsadmin -s /bin/bash -m -d /home/devopsadmin
root@ip-172-31-32-251:~# su - devopsadmin
devopsadmin@ip-172-31-32-251:~$ ls
devopsadmin@ip-172-31-32-251:~$ ssh-keygen -t rsa -b 2048 -m PEM
Generating public/private rsa key pair.
Enter file in which to save the key (/home/devopsadmin/.ssh/id_rsa):
Created directory '/home/devopsadmin/.ssh'.
Enter passphrase (empty for no passphrase):
Enter same passphrase again:
Your identification has been saved in /home/devopsadmin/.ssh/id_rsa
Your public key has been saved in /home/devopsadmin/.ssh/id_rsa.pub
The key fingerprint is:
SHA256:7fw/Hvf5fI/uyGaNz3b+Rd4Fj8EucT3s5eq0e501b2U devopsadmin@ip-172-31-32-251
The key's randomart image is:

New node

Node name

Type

Permanent Agent

Adds a plain, permanent agent to Jenkins. This is called "permanent" because Jenkins doesn't provide higher level of integration with these agents, such as dynamic provisioning. Select this type if no other agent types apply — for example such as when you are adding a physical computer, virtual machines managed outside Jenkins, etc.

CI-CD Setup

Select an item type

Freestyle project
Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.

Pipeline
Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.

Multi-configuration project
Suitable for projects that need a large number of different configurations, such as testing on multiple environments, platform-specific builds, etc.

Managing Tomcat
For security, access to the manager webapp is restricted. Users are defined in:
$CATALINA_HOME/conf/tomcat-users.xml
In Tomcat 10.1 access to the manager application is split between different users.

New Item

Enter an item name

CI-CD Setup-Project

Select an item type

Freestyle project
Classic, general-purpose job type that checks out from up to one SCM, executes build steps serially, followed by post-build steps like archiving artifacts and sending email notifications.

Maven project
Build a maven project. Jenkins takes advantage of your POM files and drastically reduces the configuration.

Pipeline
Orchestrates long-running activities that can span multiple build agents. Suitable for building pipelines (formerly known as workflows) and/or organizing complex activities that do not easily fit in free-style job type.

Java-mvn-app2- Rename

☐ **Template repository**
Template repositories let users generate new repositories with the same directory structure and files. Learn more about template repositories.

☐ **Require contributors to sign off on web-based commits**
Enabling this setting will require contributors to sign off on commits made through GitHub's web interface. Signing off is a way for contributors to affirm that their commit complies with the repository's terms, commonly the Developer Certificate of Origin (DCO). Learn more about signing off on commits.

Default branch

The default branch is considered the "base" branch in your repository, against which all pull requests and code commits are automatically made, unless you specify a different branch.

Webhooks / Add webhook

We'll send a `POST` request to the URL below with details of any subscribed events. You can also specify which data format you'd like to receive (JSON, `x-www-form-urlencoded`, *etc*). More information can be found in our developer documentation.

Payload URL *

http://13.235.244.29:8080/github-webhook/

Content type *

application/x-www-form-urlencoded

Secret

SSL verification

By default, we verify SSL certificates when delivering payloads.

Enable SSL verification | Disable (not recommended)

Which events would you like to trigger this webhook?
